

Zonta E-Club of Mississauga

The Glossary Section of the Zonta Bylaws (August 2014) says this about the two types of **Zonta Clubs...**

Club: a Zonta club (meets at a physical location)

E-club: a Zonta club that conducts its business and holds its meetings through the use of electronic communication.

The Zonta E-Club of Silicon Valley in California was formed in March of 2006 and they are the first of several clubs that decided their best alternative to being part of Zonta International was to be an “electronic” Club. However, if one looks at the listing of the current seven clubs in this group it appears that the Mississauga Club was formed in 1966... this of course is NOT true – the club only recently decided that being an electronic club would be best for their membership and the year 1966 reflects when they were originally formed (long before electronic clubs were in existence).
